

e-Watch®

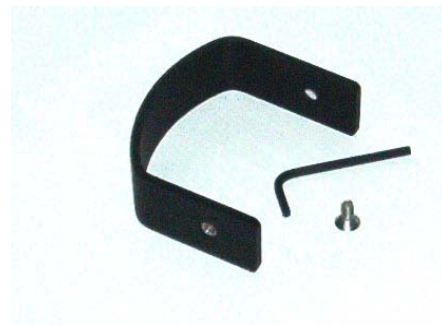

OPT-205 Inverted Bracket for e-Watch® Cameras

For mounting, e-Watch® Cameras provide a standard 1/4-20 thread mounting socket with a maximum intrusion of 1/4". This is a standard socket used by most tripods and camera mounts. The mounting socket is located on the bottom of the camera, which for most applications is more than adequate. For certain applications it is necessary to mount the camera from the top. For this purpose e-Watch has developed the OPT-205 inverted bracket.

The e-Watch OPT-205 inverted bracket is designed to securely hold e-Watch cameras in its correct position while being supported by a top connecting mount. The bracket is a U-shaped black anodized hardened steel device with a 1/4 bevelled mounting socket with a 1/4-20 thread screw included. The kit also includes a hex wrench for tightening the screw into the e-Watch camera.

Parts List

- Inverted mounting bracket
- 1/4-20 thread screw
- 1/4 hex allen wrench

Installation

To install the eWatch OPT-205 inverted mounting bracket, align the beveled hole with the thread mounting on the bottom of the camera. With the supplied 1/4"-20 thread screw, attach the bracket to the camera. Tighten the screw with the 1/4 Hex Allen Wrench. Be careful not to overtighten.

Attach the bracket to the overhead mount using the threaded hole to obtain a secure hold.
